Conversational Arabic

Completed the rigorous introductory computer science course, covering fundamental concepts such as algorithms, data structures, and problem-solving.

The Odin Project

Completed comprehensive online curriculum covering various aspects of web development, including HTML, CSS, JavaScript, and React.

PROJECTS

Memory Card

The Memory Game with Ethiopian Region flags is an interactive web-based game. Players click on shuffled flags representing different regions of Ethiopia and try to match pairs without repeating selections. It challenges memory and concentration skills while providing an engaging experience. The goal is to find all matching pairs within the shortest time possible.

Technologies—React Js, HTML, CSS.
